## **Invest in your future – part-time Front Office position for dedicated student**

We are looking for talent! Are you, or do you know, our next colleague?

OQAM is a value-driven quantitative asset management company with an open-minded and innovative culture. We have a genuine and passionate interest in finance, people, and technology. Our first product [ia](#) is a quantitative hedge fund that trade multiple asset classes and numerous instruments globally.

We put great pride in being able to employ students and help them gain practical experience. We promise a steep learning curve and that you receive an important role at the company.

### **What we offer**

You will be part of a team of people who value sharing experiences and knowledge and who see work as an opportunity to grow both professionally and as human beings. The team consists of people that have experience from successfully managing large investment mandates, building software systems for the investment management industry, building and running asset management companies as well as other friendly and ambitious student employees. Our offices in Malmö are located close to Malmö Centralstation.

You will work within our Front Office together with three full-time employees and other part-time student employees. Responsibilities will include:

- Order execution across global markets, multiple asset classes and instruments. Work hours will include weekday mornings, evenings, and Sunday nights, on a rolling schedule.
- Quantitative research. Analysis and improvements of existing and new trading strategies. Previous student employees have been involved in projects related to research of event-based equity strategies, creating and maintaining option and equity databases, deploying natural language processing (NLP) deep-learning algorithms to analyze news sentiment, etc.
- Improvement of algorithmic order execution in relation to e.g., exchanges, order types and brokers.
- Improvement and development of monitoring tools and software to address operational challenges and to enhance operational efficiency.
- Ad hoc projects.

## Who are you?

Apart from looking for the right persons and people who value what we offer, we are looking for people who value getting hands-on experience during their studies.

We truly appreciate applicants:

- Being open-minded, value driven, curious and pragmatic.
- Having a high degree of personal integrity and who are reliable and trustworthy.
- Being self-motivated, well organized, able to multi-task and thrive in a fast-paced environment and having the ability to work under pressure.
- Having excellent technical and analytical skills and attention to details.
- Enrolled at the Faculty of Engineering or the School of Economics and Management at a top tier university in a quantitative related field of study.
- Having a strong interest in financial markets.
- Who are interested in 15-20 hours of work per week, including during the school's winter and summer breaks.

In terms of skills, we are looking for students that have a profound interest and proficiency in, and are interested in developing qualities related to the following:

- Financial markets and financial research;
- Asset management and trading; and/or
- Data science and data analysis (Python, C#, SQL).

Please note that your personality, interest, curiosity and eagerness to learn is what we value most.

## Interested?

If you are interested but have further questions, please do not hesitate to send an email to our CEO, Andreas at [ao@oqam.se](mailto:ao@oqam.se) or give him a call at +46705916698. You are also more than welcome to contact one of our current student employees, Kristoffer Nordström at +46722347002 if you have any practical questions and you deem his input might be helpful.

Start date: December 2021. Are you interested and have no further questions, please apply [here](#) or visit [www.oqam.se](http://www.oqam.se). Apply before December 7.
